

**CS 522—Mobile Systems and Applications**  
**Assignment Ten—Location Mapping**

25 App provides a button that displays a map of locations. Map is centered on current location.

25 Map has markers for other clients of the chat service. Markers display information about other clients (their chat names and their reverse form geocoding).

15 Map activity is in a different app (location may be looked up directly in the map app).

30 Video demonstrating the functioning of the app.

5 Report.
